Education

Maharishi Markandeshwar (Deemed to be University), India <i>B.Tech in Computer Science; CGPA: 7.73</i>	2022 – 2026
SD Public School, India <i>CBSE (Class XII), Aggregate: 79%</i>	2021 – 2022
SD Public School, India <i>CBSE (Class X), Aggregate: 90.4%</i>	2019 – 2020

Skills

Technologies: C++, Python, Java, JavaScript, React.js, Node.js, Django, CSS, REST APIs, MongoDB, MySQL, LangChain, LangGraph, OpenAI API, RAG, Prompt Engineering, Agentic AI, Data Structures and Algorithms
Tools: Git, GitHub, VS Code, Postman, Render, Browser DevTools

Projects

Multi-Agent AI Research System <i>Python, LangChain, LangGraph, OpenAI API</i>	May 2026
- Built a multi-agent AI research system using LangChain and LangGraph, coordinating 5 specialized agents to automate end-to-end research workflows and cut manual research time by roughly 60%. - Created specialized agents for research planning, web search, content extraction, report generation, and automated quality assessment, improving report accuracy scores by 25% through LLM-based self-review. - Optimized prompt engineering and workflow orchestration to reduce redundant API calls by 30% and support multi-step reasoning across agents, lowering average per-report token usage.	
AI Finance Tracker <i>React.js, Express.js, MongoDB, OpenAI API, JWT</i>	Dec 2025
- Engineered a full-stack AI-powered personal finance platform supporting secure JWT authentication, transaction management, investment tracking, and debt analysis for 500+ sample transactions across test accounts. - Leveraged the OpenAI Responses API for natural-language expense parsing and receipt understanding, achieving over 90% categorization accuracy with fallback logic for low-confidence parses. - Implemented AI-assisted features including receipt OCR, bill parsing, and a conversational finance assistant, reducing manual data entry by an estimated 40%.	
PreRental <i>React.js, Node.js, Express.js, MongoDB</i>	Jan 2025
- Engineered a scalable web platform to streamline the apartment rental process for tenants and property owners, supporting 100+ concurrent property listings. - Designed 15+ CRUD REST APIs for property management, image handling, and user profiles following a modular MVC architecture. - Integrated real-time property search and location-based filtering, cutting average listing discovery time by roughly 35% in user testing.	

Experience

Alpha Intern – Web Development <i>Web Development Intern</i>	May 2024 – Jun 2024
- Built 10+ responsive, mobile-first web pages/components, ensuring cross-browser compatibility across 4+ modern browsers and device sizes. - Ensured visual consistency across a range of devices, ensuring a seamless experience across modern browsers and devices.	

Awards and Certifications

- ServiceNow CSA (Certified System Administrator) and CAD (Certified Application Developer) Certified
- Udemy: Master Python by Building 100 Projects – GUI, APIs, Web Scraping
- CodSoft: Web Development Internship – Built authentication systems, responsive UIs
